

Notebook Check 1 Comments & Suggestions

Brain Studies

Comments Key

(a) Activities such as the **Illusions Classified** and **Habituation Stations** should have notes with sufficient detail that you could look back at them weeks, months, or even years later and know what was done. Simply writing *felt cold* does not provide sufficient context.

(b) Great detail for text book notes. Research is finding that by taking the time to put information into your own words aids in memory retention and comprehension.
